

**Student id:** 21

**Student Name:** Fatema Azad Oishie

**Project Name:** Body shape.

**Here is a short description of this project:** This is a GYM management landing page. A complete gym management solution to handle memberships, class schedules, payments, and member tracking efficiently. Manage everything from one easy-to-use platform and focus on growing your fitness business.

**Technology:** Here is some Technology I used to build my project.

1. Html (For Structure).
2. Tailwind CSS (For Style & Responsive).
3. Font Awesome (For Icons).
4. Github (For code store & develop).

**Challenges:**

1. While I was building the project, I couldn't find some icons in Font Awesome.
2. Then I faced so much challenging to create Position layout & banner section's lower portion. Also doing rotated banner image.
3. When I was tried to responsive this website then I was faced so many problems. It was so tough for me.
